

# FROM PLASTIC TO PURPOSE

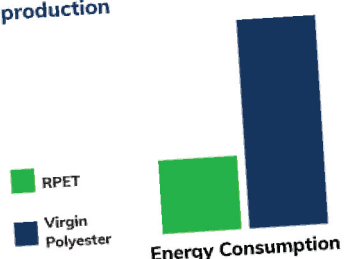

## WHY RPET?

### CARBON

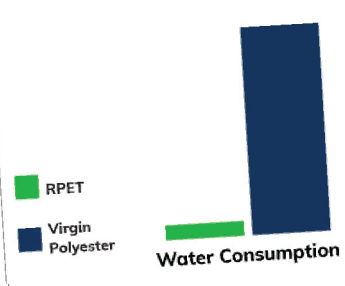

RPET's production produces **65.5%** less carbon than virgin polyester and **12%** less than cotton.

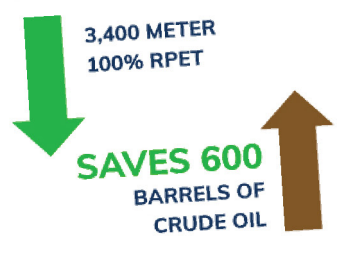

RPET's production needs **only 30%** of the energy required for virgin polyester's production

RPET's production needs **1/10th** of water compared to virgin polyester

Preferring RPET to virgin fabrics **saves fossil resources**
